EDUCATION

- Indira Gandhi Delhi Technical University for Women** New Delhi, India
Bachelor of Technology; GPA: 7.5
Branch: Electronics and Communication Engineering with Artificial Intelligence
(July 2021 - May 2025)
- Dr. Virendra Swarup Education Centre** Kanpur, India
Intermediate-93% Matriculation- 95.4%
(2018 - 2020)

EXPERIENCE

- Associate Software Engineer at Servicenow** Hyderabad, India
HTML, CSS, JavaScript, React.js, LitElement, ServiceNow Glide APIs
(July 2025 - Present)
 - Working with the ServiceNow Store team on SEO improvements, rendering pipeline enhancements (SSR/CSR hydration, sorting, filtering, caching), and user experience optimizations.
 - Led migration of key workflows from CSR to SSR, fixing critical loading issues on the purchase page and improving performance and defect rates.
 - Engineered a multi-persona AI review framework (SE, QA, Performance, Security, DevOps, Devil's Advocate) to simulate code reviews, auto-raise PRs, and enrich work notes, enhancing release quality and reducing manual effort.
 - Built an agentic CI/CD workflow that syncs demand records across environments and auto-generates epics and stories, reducing manual SDLC intake effort.
 - Developed Playwright end-to-end test automation integrated into Jenkins nightly runs to validate critical Store workflows and catch regressions before release.
- Software Engineer Intern at Amazon** Hyderabad, India
Java, Javascript, AWS, Python, Typescript
(Jan 2025 - June 2025)
 - Created an LLM-based floor extraction model using Claude 3.5 on Amazon Bedrock, achieving 87% prediction accuracy.
 - Led the ARS transition from batch to real-time OpenSearch indexing by streaming Necto updates via Lambda, enabling incremental upserts.
 - Developed full-stack CloudWatch dashboards using AWS CDK to track ingestion health and alert on anomalies.
 - Enforced Step Function ingestion payload limits and built a payload offloading mechanism to S3 for handling large payloads.
 - Migrated legacy shared libraries in the GAMCore-Live pipeline (e.g., GAMCli, GAMAccessLayer, GAMTestCommon) from JDK 8 to JDK 21, resolving cascading dependency conflicts and aligning the pipeline with PE risk requirements.
- Associate Software Engineer Intern at Servicenow** Hyderabad, India
HTML, CSS, React Js, Servicenow Administration Tools.
(June 2024 - August 2024)
 - Worked with the app-store team in the platform org to develop modals and screens for the team. Worked to develop frontend for the Servicenow store website and helped in the migration of website from Angular Js to React Js.
- Women Engineers Program supported by Google** Remote
Received scholarship for being among the top 250 out of 28000+ applicants.
(April 2022 - April 2024)
 - Completed technical and corporate training (Clean Coding, OOP with Python, Git, Linux, project management) and was mentored directly by engineers at Google.

PROJECTS

- EventPulse:** (June 2026)
Built a production-grade event-driven fraud detection platform that ingests transaction events via REST APIs, scores them through a real-time Kafka streaming pipeline, and persists fraud alerts in PostgreSQL. Deployed on Kubernetes with Horizontal Pod Autoscaling (2-10 replicas), RBAC, and full Prometheus/Grafana observability; load tested at 818 transactions with 0 failures and P99 latency under 48ms.
-Tech: Go, Apache Kafka, PostgreSQL, Docker, Kubernetes, Prometheus, Grafana
- Breast Cancer Classification using Adaptive Voting Ensemble:** (March 2025)
Developed a breast cancer classification system integrating Decision Tree and Random Forest with an adaptive weighted voting mechanism, achieving 97% accuracy on the Wisconsin Diagnostic Dataset.
-Tech: Python, Scikit-learn, Ensemble Learning
- MetroNav+:** (May 2023)
A program that will take information (name) of the source station and the destination station of Delhi Metro from the user and display the fare and shortest metro route to reach the destination for a seamless travel experience. It will also have a metro map for commuter's better navigation.
-Tech: Java

SKILLS SUMMARY

- Languages:** Java, Python, Go, TypeScript, JavaScript, SQL, Kotlin, C++
- Frontend:** React.js, LitElement, HTML, CSS, SSR/CSR
- Cloud/Infra:** AWS (Lambda, CDK, S3, Bedrock, OpenSearch), Docker, Kubernetes, Kafka, PostgreSQL
- AI/ML:** LLMs, Agentic Workflows, Scikit-learn, Prometheus, Grafana
- Tools:** VS Code, IntelliJ IDEA, Android Studio, Git, Eclipse

CERTIFICATIONS

- Coding Ninjas certificate of achievement for getting an AIR-996 and college specific rank-4 in Codekaze (September, 2023)
